PHILIPS

IPL hair removal system
For treatment on body and face 140.000 flashes, Cordless, Slide and flash technology

SC2006/11

Highlights

Long lasting smoothness

Philips Lumea applies gentle pulses of light to the hair root. As a consequence the hair sheds naturally and hair regrowth is inhibited. Repeating this treatment regularly will keep your skin smooth every day.

Effortlessly effective

Our clinical studies have shown significant hair reduction in as little as four bi-weekly treatments resulting in smooth hair free skin. To maintain these results, simply repeat the treatment when needed. Time between treatments may vary based on your individual hair regrowth.

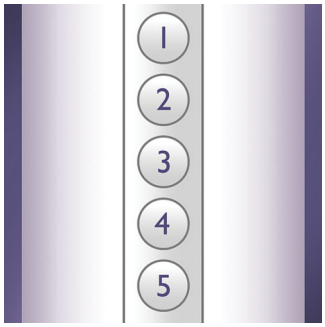
IPL technology

Philips Lumea uses an innovative light-based technology called IPL (Intense Pulsed Light), derived from the technology used in professional beauty salons. Philips has adapted this technology for safe and effective use in the comfort of your own home. Philips worked closely with leading dermatologists to develop our breakthrough hair removal system. For more than 10 years we carried out extensive consumer research with more than 2000 women.

Suitable hair and skin types

Philips Lumea works effectively on (naturally) dark blonde, brown and black hairs. As with other light-based treatments, Philips Lumea is NOT effective on red, light-blonde or white/grey hair. Philips Lumea is also NOT suitable for very dark skin.

Five light energy settings



Philips Lumea has five adjustable light energy settings to ensure gentle but effective treatment. Used correctly, Philips Lumea's IPL treatment is safe and gentle to use even on sensitive skin and sensitive body areas.

Application areas

Use with confidence to remove hair on face (upper lip, chin and sideburns) and body parts including legs, underarm, bikini area, belly and arms.

Cordless convenience

Lumea's unique cordless design is perfect for maximum reach and ease of use.

No replacement parts needed

Philips Lumea is a complete solution that comes ready to work right out of the box. More importantly, it does not require any replacement lamps or gels.
